**Student Comments:**

Really enjoyed Pick as a professor. He gave the class a really unique and interesting spin. Taught us more than just bugs!

Pick is one of the many amazing professors in the Ento department. I personally feel the entomology instructors are some of the most effective and valuable faculty members at UGA. Highest regards

very passionate and interested about the course material. He truly encompassed the service part of service learning and ENTO 3300 with his moth project. He has built the worlds largest moth and insect database for classification. Great guy!

I have always loved Pick and his input with the class. He is very knowledgeable and fun to be around. He has so much to teach.

Great class with open classroom where you are encouraged to speak up and ask questions. Had a blast.

good teacher, interested in the material he teaches.

Pick was a great teacher. He was clearly very interested in the material which helped to stimulate interest from students. He kept class light and humorous which also helped students stay motivated.

Great professor. Stimulated meaningful class discussions and always encouraged critical thinking

I loved this course, really helped me overcome my fear of bugs.

Great teacher. Enthusiastic about material. Highly recommend
